Selected Work

Private Social Network for a Business

Full-Stack Development & UI/UX Design

Designed and developed a full-stack social platform — similar to Facebook in functionality — enabling the business to connect their network, streamline internal communication, and run targeted ads within their own ecosystem.

↑ ~60% Internal Communication

↑ ~45% Network Growth

↑ ~50% Ad Revenue

Business Website Redesign

End-to-End Design & Development

Redesigned and rebuilt a complete business website — transforming an outdated digital presence into a modern, fast, and conversion-focused experience.

↑ ~40% Better Visual Appeal

↑ ~30% User Engagement

↓ ~50% Bounce Rate

Education

Software Engineering

Mehran University of Engineering and Technology, Hyderabad

About

I get called when a business needs more than just a developer or just a designer — they need both, working as one. When a website exists but fails to stop the scroll, hold

attention, or earn a second glance. When the brand is serious but the website doesn't look like it. When they need something built right and built beautifully — from the first pixel to the final line of code.

3+ years of building and designing across industries — working with real businesses, solving real problems, and delivering web experiences that perform as good as they look.
